Sericyne® Silk
When Light becomes Poetry

2026

Sericyne® silk is a unique natural material, spun directly by silkworms into non-woven silk sheets. Its delicate, irregular structure diffuses light with softness, depth and vitality, creating luminous effects unlike those of any other material.

Drawing on more than ten years of expertise in interior architecture and design, and the successful completion of prestigious projects worldwide, Sericyne now presents its first lighting collection. Designed for interior architecture, hospitality, residential spaces and private clients, each luminaire showcases the singular beauty of Sericyne® silk.

Every piece is one of a kind, meticulously handcrafted to order by our artisans in our workshops in the Cévennes region of France.

Alba 200

Light passes through the natural silk, revealing its delicate irregularities. A discreet yet precious presence for the most intimate spaces.

Design: Sericyne
Dimensions: 290x200x492 mm
Materials: Soie Sericyne® et métal noir
Light Source: LED E14 (FR) 3000 K

Alba 400

An airy silhouette that seems to float in space. The silk diffuses a soft, organic light imbued with natural elegance and refinement.

Design: Sericyne
Dimensions: 460x294x294 mm
Materials: Soie Sericyne®
Light Source: LED E27 (FR) 2700 K

Alba 600

A luminous, sculptural piece with architectural proportions. The material itself becomes light.

Design: Sericyne
Dimensions: 380x320x1180 mm
Materials: Soie Sericyne®
Light Source: LED E27 (FR) 2700 K

La lampe qui va de soie

The lamp explores the meeting point between nature and luxury, artifice and beauty. Its restrained, refined light expresses a contemporary elegance—both raw and luxurious.

Design: Carbone 14 Studio – Julien Gorrias

Dimensions: 380x320x1180 mm

Materials: Soie Sericyne®

Light Source: LED E27 (FR) 2700 K

Montcaud

Like a shimmering cloud brought to light, Montcaud unveils the full richness and depth of Sericyne® silk. Infinitely modular, it can be composed into bespoke installations that engage in a dialogue with any interior.

Design: Sericyne
Dimensions: 200x140x160 mm
Materials: Soie Sericyne®
Light Source: LED E14 (FR) 6400 K

For any enquiries, including technical specifications and pricing, our team is at your disposal.

Production lead times range from **6 to 12 weeks**.

We also collaborate with architects, designers and brands to develop bespoke lighting and custom-made projects tailored to your specific requirements.
