

ULTRA PREMIUM PURE SILK EYE PATCHES

French patented silk process.

SERIBEAUTY *by* SERICYNE®

ULTRA PREMIUM SILK PATCH FOR EYES

Our patches are made from raw non-woven Sericyne silk, a rare, 100% natural material produced in France, in the Cévennes, through a patented cruelty-free process.

WHY SILK?

More than a support, a cosmetically active material

Silk naturally contains two proteins with recognised cosmetic properties: fibroin, the structural core of silk, and sericin, the protein that coats its fibres. Together, they provide moisturising and regenerating benefits.

On contact with water, sericin solubilises, helping to maintain skin balance: the patch itself takes actively part in the cosmetic activity.

BENEFITS FOR CONSUMERS

Second skin transparency

Extreme softness to the touch

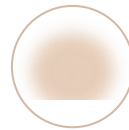

Perfect fit to the eye contour

Moisturising & regenerating proteins

Tums whites after 20 min

Gentle, no stringing

WHY CHOOSE SERIBEAUTY SILK PATCHES?

THE ULTRA-FINE SILK VEIL

Extremely fine (5 microns), very long silk threads give the patch its exceptional texture, remarkable strength and perfect flexibility.

1/ GENTLE ON SKIN
natural silk filaments deposited as a non-woven veil

02/ HYDRATES
maintains the well releases sericin onto the skin

3/VISIBLE RESULTS
20 minutes after the patch turns white: the ritual is complete.
